DETAILED ACTION

Response to Amendment

1. After further consideration the finality of the last action is withdrawn because of new ground of rejections.

Terminal Disclaimer

2. The terminal disclaimer filed on 4-9-07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,852,450 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

3. Claims 4, 8-9, 29; 11; 12-13; 36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 4 is rejected because there is no support for a positive electrode including an active material including lithium and a negative electrode having an active material including sulfur. The positive electrode comprises sulfur and the negative electrode comprises lithium. Claim 12 is rejected because there is no support for a negative electrode including sulfur.

Art Unit: 1745

In claim 36, there is no support in the specification for the phrase "the second solvent is between 70% and 80% inclusively by volume of the electrolyte". There is no support for claiming 70% by volume as a range point. There is support for 20-80% by volume or 60-80% by volume.

4. Claims 4, 8-9, 29; 10, 31-35; 11; 12-13, 14, 16-17, 36-40, 43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4, 10, 43 are rejected because it is unclear what is meant by "a dielectric constant that is greater than or equal to 20".

Claims 11, 12 and 14 are rejected because it is unclear what is meant by "a polarity high enough to dissolve an ionic compound".

Claims 4, 10, 43 and 11, 12, 14 are rejected because it is not clear what the difference is between "a dielectric constant that is greater than or equal to 20" cited in claims 4, 10 and 43 versus "a polarity high enough to dissolve an ionic compound" cited in claims 11, 12, 14 because claim 29 which is dependent on claim 4, claim 31 which is dependent on claim 10 and claim 43 versus claim 14 each claim that the solvent is methanol, hexamethyl phosphoramidate, ethanol and isopropanol.

Claim 40 is rejected because it is unclear how claim 40 which is dependent on claim 14 further limits the claim because claim 14 already claims the first solvents.
